

# SHAYAN KHAN AFRIDI

Aspiring AI / Software Engineer / Full Stack AI Developer

☎ +92 310 2629824    ✉ shayaankhaanafridii@gmail.com    📍 Gulshan-e-Maymar, Karachi

---

## ABOUT ME

Software Engineering student with hands-on experience in machine learning, data analysis, and AI-powered application development, including production-style projects using Python, Scikit-learn, and the Gemini API. Currently expanding into Generative AI, including LLM foundations, Retrieval-Augmented Generation (RAG), vector databases, and prompt engineering. Seeking an AI/ML or Generative AI internship to apply and grow these skills.

---

## SKILLS

**Programming & Scripting:** HTML, CSS, JavaScript, Python, Java, SQL

**Generative AI:** Large Language Model (LLM) Foundations, Retrieval-Augmented Generation (RAG), Vector Database Fundamentals, Embeddings, Prompt Engineering, LLM Application Fundamentals, Gemini API Integration

**Machine Learning & Data Science:** Machine Learning, Deep Learning, Scikit-learn, Pandas, NumPy, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Model Development & Evaluation

**Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI, Streamlit

**Databases:** MongoDB, MySQL, Supabase

**Tools:** Git, GitHub, n8n (Workflow Automation), BeautifulSoup (Web Scraping)

---

## EXPERIENCE

### Data Science Intern

**10 Pearls | April 2026 - July 2026**

- Developed machine learning models for AQI forecasting as part of the Pearls AQI Predictor project.
- Performed data collection, feature engineering, and exploratory data analysis (EDA) using weather and pollutant datasets.
- Contributed to automated data pipelines and dashboard development supporting real-time AQI predictions.

### Data Science and Analytics Intern

**DevelopersHub Corporation | March 2026 - April 2026**

- Completed a 6-week internship applying data analysis, machine learning, and business insight techniques.
- Used Python, SQL, and data visualization tools to clean, analyze, and interpret datasets.
- Applied data science techniques to support business insights and data-driven decision-making.

### Data Science Intern

**Creovata | May 2025 - July 2026**

- Performed data cleaning, preprocessing, and exploratory data analysis using Python, Pandas, and NumPy.
- Built and evaluated basic machine learning models using scikit-learn, including dataset preparation and feature engineering.
- Supported data handling, model testing, and project documentation while collaborating on data science tasks.

## PROJECTS

### WebGen IDE – AI-Powered Website Builder

- Developed an AI-powered website generation platform using the Gemini API to create and update websites from natural-language prompts.
- Integrated a code editor, terminal, and live preview environment for real-time website development.
- Enabled AI-assisted website modifications driven by natural-language instructions.

### Pearls AQI Predictor – Air Quality Forecasting System

- Built an end-to-end AQI forecasting system integrating external weather and pollutant APIs.
- Performed data collection, feature engineering, and machine learning model development for AQI prediction.
- Developed automated data pipelines and a Streamlit dashboard for real-time AQI monitoring and 3-day forecasts.

### HR Automation System using Agentic Ai and Machine Learning

- Built n8n automation workflows for LinkedIn job posting, resume screening, and candidate shortlisting.
- Developed an AI interview system using Gemini API, Speech-to-Text (STT), and Text-to-Speech (TTS) to conduct and evaluate candidate interviews.
- Applied machine learning to analyze employee performance and salary data, supporting data-driven HR decisions.

### ArtistryHub – Digital Art Gallery Website

- Developed a full-stack digital art gallery using React, Node.js, Express, and MongoDB for showcasing and managing digital artworks.
- Integrated AI-powered image generation, enabling users to create and explore generated digital artwork.
- Designed data workflows for users, artworks, categories, carts, and orders, focusing on usability and scalable data management.

---

## EDUCATION

### Bachelor of Science in Software Engineering

#### Sir Syed University of Engineering & Technology | 2023 - Present

Final Year Student of BS Software Engineering, having a CGPA of 3.87

### Intermediate in Pre-Engineering

#### Govt. Dehli Science College | 2021 - 2023

### Matriculation in Science

#### MIB High School | 2008 - 2021

---

## CERTIFICATIONS

- **Power BI: Data Modeling and Data Analysis**  
Whizlabs | Coursera
- **Power BI: Data Visualization and Analysis**  
Whizlabs | Coursera
