Summary

AI Engineer and final-year Software Engineering student specializing in Generative AI, LLM applications, and Agentic AI systems. Builds end-to-end AI products using LangChain, LangGraph, RAG pipelines, vector databases, FastAPI, and Next.js, along with AI automation (n8n) and voice agents (Vapi, Retell, ElevenLabs), backed by a strong machine learning and data science foundation.

Technical Skills

Generative AI & LLMs: LLM Foundations, Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Structured Outputs, Gemini API, OpenAI API

Agentic AI & Frameworks: LangChain, LangGraph, AI Agents, Multi-Agent Workflows, Tool & Function Calling, Chatbot Development

Voice AI: Vapi, Retell AI, ElevenLabs, Speech-to-Text (STT), Text-to-Speech (TTS), Conversational Voice Agents

AI Automation: n8n Workflow Automation, API Integrations, Webhooks, Automated Data Pipelines

Machine Learning & Data Science: Scikit-learn, Deep Learning, Pandas, NumPy, Data Preprocessing, EDA, Feature Engineering, Model Development & Evaluation

Backend & Frontend: Python, FastAPI, Node.js, Express.js, REST APIs, React, Next.js, JavaScript

Databases: Vector Databases (Pinecone, FAISS, ChromaDB), MongoDB, MySQL, Supabase

Languages & Tools: Python, JavaScript, Java, SQL, Git, GitHub, Streamlit, Power BI, Matplotlib, Seaborn, BeautifulSoup

Experience

AI Developer | *Wigatech Solutions*

Aug 2026 – Present

- Build production AI solutions: LLM applications, RAG pipelines, and agentic workflows using LangChain, LangGraph, and FastAPI.
- Develop AI chatbots and voice agents (Vapi, Retell, ElevenLabs) for automated customer interaction and lead handling.
- Design n8n automation workflows integrating third-party APIs, databases, and LLMs to replace manual business processes.

Data Science Intern | *10Pearls*

Apr 2026 – Jul 2026

- Developed machine learning models for AQI forecasting using weather and pollutant datasets.
- Contributed to automated data pipelines and dashboards supporting real-time AQI predictions.

Data Science & Analytics Intern | *DevelopersHub Corporation*

Mar 2026 – Apr 2026

- Used Python, SQL, and visualization tools to clean, analyze, and interpret datasets for business insights.
- Built and evaluated ML models with scikit-learn, including dataset preparation and feature engineering.

Data Science Intern | *Creovata*

May 2025 – Jul 2025

- Performed data cleaning, preprocessing, and EDA with Pandas and NumPy; supported model testing and documentation.

Projects

Softira – Agentic AI Lead Generation System

LangGraph, FastAPI, Next.js

- Built a multi-agent system that generates leads, qualifies them against defined criteria, and drafts personalized outreach emails.
- Orchestrated agent workflows and state-driven decision logic with LangGraph, exposed through a FastAPI backend.
- Built a Next.js dashboard to manage lead pipelines, review qualification results, and edit drafts before sending.

HR Automation System

Agentic AI, n8n, Gemini API, Machine Learning

- Built n8n workflows for LinkedIn job posting, resume screening, and candidate shortlisting.
- Developed an AI interview system using Gemini API with STT/TTS to conduct and evaluate candidate interviews.
- Applied machine learning to employee performance and salary data for data-driven HR decisions.

WebGen IDE – AI-Powered Website Builder

Gemini API, React, Node.js

- Built an AI platform that generates and updates complete websites from natural-language prompts.
- Integrated a code editor, terminal, and live preview for real-time, AI-assisted development.

Pearls AQI Predictor – Air Quality Forecasting System

Python, Scikit-learn, Streamlit

- Built an end-to-end AQI forecasting system integrating external weather and pollutant APIs.
- Delivered automated pipelines and a Streamlit dashboard for real-time monitoring and 3-day forecasts.

ArtistryHub – Digital Art Gallery Platform

React, Node.js, Express, MongoDB

- Developed a full-stack gallery with AI-powered image generation and scalable workflows for users, artworks, carts, and orders.

Education

BS Software Engineering – CGPA 3.87/4.00 | *Sir Syed University of Engineering & Technology*

2023 – Present

Intermediate, Pre-Engineering | *Govt. Dehli Science College*

2021 – 2023

Matriculation in Science | *MIB High School*

2008 – 2021
